TECHNICAL SUMMARY

Passionate Developer with 10 years of overall software engineering experience—including 5 years specializing in Game development, specializing in Unity (C#) and Cocos Creator. Proven track record in developing diverse genres (Casual/Puzzle, Card Game, Realtime Strategy) across Mobile & PC platforms. Strong background in OOP, gameplay systems, custom Shader writing, mobile performance optimization, and full-stack capabilities including Firebase services and database operations.

CORE TECHNICAL SKILLS

- **Game Engines & Languages:** Unity3D (C#), Cocos Creator 2 (JS/TS), GameMaker Studio, Three.js, OOP, Game Architecture.
- **Graphics & Shaders:** Custom Shader writing (Glow, Sprite Sheet, Toon, Wind effects), Basic Photoshop & Blender 3D modeling.
- **Gameplay & Systems:** Casual/Puzzle Mechanics, Realtime Strategy, Card Game Systems, AI Logic & Pathfinding (A* / NavMesh), DOTween Animation, Mobile Performance Optimization.
- **Networking & Backend:** Pomelo (Realtime Networking), Firebase (Auth, Realtime Database), Cronjobs, SQL Stored Procedures (Stress Testing/Data Simulation), Unit Testing, RESTful APIs.
- **Tools & Secondary:** Git, Agile/Scrum, Angular, TypeScript, HTML5/CSS3.

WORK EXPERIENCE

Remote Game Developer | Client (Canada) (01/2026 – Present)

Online Realtime Card Game Project

- Developed an online multiplayer Card Game using Cocos Creator 2 and Pomelo framework for realtime networking.
- Implemented core game logic, card mechanics, and synchronized realtime game states between client and server.
- Optimized mobile performance and UI responsiveness for smooth online gameplay.

Casual Game Developer | Nev studio (02/2025 – 12/2025)

Mobile Casual & Puzzle Game Portfolio

- Developed multiple Mobile Casual/Puzzle games featuring diverse gameplay mechanics (Restaurant Management, Cover Shooter, Wave Defense / Age of War mechanics).
- Built complete gameplay loops, enemy AI logic, reward systems, and UI flow using Unity (C#) and OOP design principles.
- Utilized DOTween for smooth UI/gameplay animations and Pathfinding (A* / NavMesh) for enemy movement and unit pathing.
- Integrated Firebase Authentication and Realtime Database for player data synchronization and game progress save/load.

Software Engineer | eKonect Solutions (02/2023 – 1/2025)

SaaS & Interactive 3D Applications (Norwegian Market)

- Unity3D Interactive App: Developed an interactive 3D Mobile Application featuring complex UI systems and 3D environment rendering, focusing on seamless model interactions.
- Frontend Architecture & Testing: Led the frontend structure of a B2B platform using Angular; wrote Unit Tests to ensure system reliability and seamless API integration.
- Performance & UI: Built reusable component libraries reducing UI dev time by 50%, and refactored core dashboard lowering load time from 120s to under 3s.
- Company page: <https://www.ekonect.no/>

Frontend Developer | FPT Software (07/2020 – 01/2023)

Enterprise Solutions for Japanese Clients

- Modernization: Led the migration of a large-scale HR system from legacy Java JSP to Angular 14, improving user engagement by 40%.
- Database Stress Testing & Cronjobs: Authored complex SQL procedures to generate bulk datasets for production stress testing; configured cronjobs for automated task processing.

Unity3D Developer | Supermassy Game (2014 – 06/2020)

Mobile Strategy Game Projects

- Designed and coded pixel art strategy games frame-by-frame using Unity and C#.
- Leveraged Odin Inspector to extend Unity Editor tools, streamlining custom data configuration and workflow for level designers.
- Created core gameplay source code for a strategy game title, which was later acquired by publisher RedAntz.
- Acquired Game Title: Monsters War - went on to achieve millions of downloads on Google Play Store.
- Google Play Link: <https://play.google.com/store/apps/details?id=com.redantz.game.monsterswar&hl=en>
- Studio Fanpage: <https://www.facebook.com/supermassygame>

EDUCATION & LANGUAGES

English: Professional working proficiency – fluent in reading technical documentation, daily communication, and meetings.

Education: Vocational Diploma in IT | University of Technology and Education – UDN (2013)
